 # 248 Name: **Unalakleet River** Cause: Lightning Admin: AND  
 Narrative: The fire was reported by Fairbanks Flight Services. Surveillance aircraft N114MN flew the fire and estimated the size at 75 acres, burning in tundra, running, and 90% active perimeter. There were several structures approximately two miles in front of the head and several other structures in the area along the Unalakleet River. There were thunderstorms in the area, but the fire was not receiving precipitation. Two scoopers, an ASM, and one load of smokejumpers responded. At 1830, ASM A-4 arrived on scene and reported the fire was running at 100 acres and winds were from the south at 10-15 mph, with spruce stands in front of the head. At 1915, the IC requested another load of smokejumpers. The fire grew to 200 acres and was moving uphill away from the Unalakleet River. At 2130, the IC reported the fire was now 300-400 acres and the scoopers are needed in order to make progress. At 2230, the second load of smokejumpers were deployed and the fire was estimated at 500 acres, flame lengths 1-3 feet, progressing uphill into the spruce stands. At 2400 the IC reported that the fire was beating out well and the smokejumpers were making extremely good progress.
